

There were three parts to this small project located in Romeo, MI. The first portion of the project was the addition of a third car bay to the existing garage. The challenge was to seamlessly blend the new portion of the garage into the existing. This was achieved by changing the direction of the gable end wall perpendicular to the existing ridge direction. The second portion of this project was to enclose the existing covered walkway leading to the garage. We added a side entry door facing the driveway and a large sliding glass door leading to the new patio. The patio was the third portion of the project. It was covered by a cedar pergola that wrapped around the garage leading to a garden shed. The patio itself was done in stamped concrete creating sanctuary-like space hidden behind the garage.

Project Specifications

Construction Type -
Addition/Renovation
Style - American/ Cape Cod
Square Footage - N/A
Site Size - 1 Acres
Date of Completion - 2004

Project Services

Design Development
Construction Administration
