

This renovation incorporated the design of multiple projects throughout the existing home. The first project was the addition of an oversized single car garage with storage located below the new garage and linked into the existing basement. Secondly, the unfinished basement was transformed into a large entertainment space with a kitchen, bathroom, and children's playroom. The new addition off the rear of the home, stepped down 2' to contain a space for a large media room. Above the media area is new laundry room. We utilized the existing laundry room as a new mud room with lockers for the children's coats and shoes. The stairway leading down into the new finished basement was opened up on the main level as well as the lower level to generate a more inviting feel as you enter the basement.

Project Specifications

Construction Type -
Renovation/Addition
Style - American, Cape Cod
Square Footage - 2840 SF Existing, 90
SF Addition = 2930 SF Total
Site Size - 1.1 Acres
Date of Completion - May 2007

Project Services

Design Development
Construction Administration

General Contractor

Usztan Construction
