McKay Residence
Dryden Township, MI

This renovation/addition took a modest 1970's ranch and turned it into a sprawling 4600 square foot residence with a spacious master suite, large kitchen and entertainment area. A new three car garage was added and the existing garage was turned into a mudroom and pantry. On the east side of the home, an addition with a full walk out basement was added containing the master suite, a sitting room, and a media room. On the lower level a guest suite was added along with a large storage area. The existing kitchen was enlarged and a new walk-in pantry was added. The existing front entry was expanded to include a new coat closet. One of the existing bedrooms was modified to house a new laundry room with access from both the hallway as well as the master closet. The exterior was dressed in vinyl siding with cultured stone on the front elevation to create a new, distinguished aesthetic for this renovated home.

Project Specifications

Construction Type -
Renovation/Addition
Style - French Country/American
Square Footage - 2504 Existing SF,
2098 Addition SF = 4602 Total SF
Site Size - 4 Acres
Date of Completion - 2006
