Morrow Residence
Metamora, MI

This project, located in Metamora, included the addition of a large entertainment room, expansion of the existing master suite and renovations to the majority of the existing home. The great room was designed with an "old world" aesthetic using functional heavy timber trusses and a fieldstone fireplace.

The existing residence dictated the exterior proportions and materials of the new addition as well as the areas of renovation. The basement below the new great room contains a large game room and theater room as well as a playroom and a full guest suite. In total this residence contains six bedrooms and seven bathrooms.

The greatest challenge with this project was incorporating the existing aesthetic of the home into the new renovation and ensuring a consistent look to the final project.
